About

B.Tech Computer Science and Engineering student interested in web development and software development. Familiar with Java, Python, SQL and front-end technologies. Building technical skills through academic and personal projects. Seeking a technical internship to apply existing knowledge, learn from real-world development, and contribute to a collaborative team.

Education

B.Tech – Computer Science and Engineering **2025 – 2029**
Uka Tarsadia University (AMTICS), Gujarat | 3rd semester

12th / Higher Secondary (CBSE) **2025**
PP Savani Chaitanya Vidhya Sankul

10th / Secondary (ICSE) **2023**
Metas Adventist International School

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL
Web Technologies: HTML5, CSS3, React.js
Database: SQL
Development Tools: Git, GitHub, VS Code, XAMPP

Projects

Shop Management System **GitHub: 25amtics444-bit**
HTML, CSS, JavaScript, PHP, MySQL, XAMPP

- Created a web-based system that keeps a shop's products, stock, customers and sales records together in one dashboard.
- Built the user interface with HTML, CSS and JavaScript, and handled data storage and logic using PHP with MySQL on XAMPP.
- Intended to move day-to-day record keeping from paper registers to a digital system, so stock and sales are quicker to check.

Retail Flow **GitHub: 25amtics444-bit**
HTML, CSS, JavaScript, PHP, MySQL, XAMPP

- Developed a retail management project that follows a sale from inventory and billing through to the final receipt.
- Covers product and stock tracking, customer records and bill generation for a retail store.
- Intended to make checkout faster and reduce mistakes that come from manual billing.

Certifications & Workshops

- Getting Started with Linux Fundamentals (RH104) – Red Hat Training (Credly badge)
- GitHub Workshop
